Overview of Bocconi University

Bocconi University, founded in 1902, is situated in Milan, Italy, and is renowned for its contributions to economics and business education. The university is consistently ranked among the top institutions globally, particularly in fields such as finance, economics, and management. Its commitment to research and innovation attracts students from around the world, creating a diverse academic community.

The PhD program in Economics at Bocconi is designed to provide students with a comprehensive understanding of economic theories, quantitative methods, and empirical research. The curriculum is tailored to prepare students for academic and research careers, equipping them with the necessary tools to tackle complex economic issues.

PhD Program Structure

The PhD program in Economics at Bocconi University typically spans three to five years, depending on the student's progress and research focus. The program is divided into coursework, research, and

dissertation phases, ensuring a balanced approach to both theoretical knowledge and practical application.

Coursework

In the initial phase, students undertake a series of advanced courses covering various topics in economics, including microeconomics, macroeconomics, econometrics, and specific fields such as labor economics and industrial organization. This coursework is designed to build a solid foundation in economic theory and methodologies.

Research Phase

Following the coursework, students transition into the research phase, where they begin developing their dissertation proposals. During this time, PhD candidates work closely with faculty mentors and engage in seminars that foster collaborative research discussions.

Dissertation

The dissertation is the culmination of the PhD experience, where students are expected to conduct original research that contributes to the field of economics. Successful completion of the dissertation is essential for graduation and typically involves a defense before a committee of faculty members.

Application Process

The application process for the Bocconi University PhD in Economics is competitive and requires careful preparation. Prospective students must meet specific academic qualifications and submit a comprehensive application package.

Eligibility Criteria

Applicants typically need a master's degree in economics or a related field, with a strong academic record. Additionally, proficiency in quantitative methods and research experience are highly valued.

Required Documents

The application package generally includes:

- Transcripts from all previous academic institutions
