Overview of CU Boulder Economics Major

The CU Boulder Economics Major is designed to equip students with analytical and quantitative skills necessary to understand complex economic issues. The program emphasizes critical thinking, problem-solving, and the ability to interpret and analyze data. Students in the Economics Major will explore various economic models and theories, gaining insights into how economic principles influence real-world scenarios. The major also emphasizes the importance of policy analysis, preparing students to engage with current economic challenges effectively.

CU Boulder is renowned for its distinguished faculty, cutting-edge research opportunities, and supportive learning environment. The Economics Department fosters a collaborative atmosphere where students can engage with their peers and professors on various research projects and discussions. This vibrant academic community enhances the overall educational experience, making the CU Boulder Economics Major a compelling choice for aspiring economists.

Program Structure and Curriculum

The Economics Major at CU Boulder typically requires students to complete a series of core courses, electives, and a capstone project. The program is structured to provide students with a well-rounded education in both theoretical and applied economics.

Degree Requirements

To earn a degree in Economics, students must complete a minimum of 120 credit hours. This includes core courses in economics, related electives, and general education requirements. The curriculum is designed to ensure that students have a strong grasp of both microeconomic and macroeconomic principles, as well as quantitative methods.

Electives and Specialization

Students have the opportunity to choose from a variety of elective courses, allowing them to tailor their education to their interests and career goals. Popular areas of specialization within the Economics Major include:

- Environmental Economics
- International Economics
- Labor Economics
- Public Policy
- Financial Economics

Core Courses in the Economics Major

The core curriculum of the CU Boulder Economics Major includes essential courses that lay the foundation for advanced study in economics. These courses cover a range of topics, ensuring that students develop a comprehensive understanding of economic theory and practice.

Microeconomics

This course focuses on individual consumer behavior, firm production, and market structures. Students learn about supply and demand, pricing strategies, and the role of government in regulating markets.

Macroeconomics

In this course, students explore broader economic indicators such as GDP, inflation, and unemployment rates. The curriculum examines how monetary and fiscal policies impact the economy as a whole.

Econometrics

Econometrics combines statistical methods with economic theory to analyze economic data. Students learn to apply quantitative techniques to real-world economic problems, enhancing their analytical skills.
