Introduction to the Economics Major at Georgetown

The economics major at Georgetown University is offered by the McDonough School of Business and the College of Arts and Sciences. This program is designed to provide students with a comprehensive understanding of economic principles, quantitative methods, and analytical reasoning. The curriculum is structured to encourage critical thinking and problem-solving skills, which are essential in today's global economy.

Students are exposed to a wide range of topics, including microeconomics, macroeconomics, international economics, and economic policy analysis. This diverse curriculum ensures that graduates are well-prepared to tackle complex economic issues and contribute to the development of effective solutions.

Georgetown's strategic location in Washington, D.C., provides students with unique access to political, financial, and non-profit institutions, enhancing their educational experience through internships and real-world applications of economic theories.

Curriculum Overview

The curriculum for the economics major at Georgetown is comprehensive, combining theoretical foundations with practical applications. Students are required to complete a set of core courses

along with electives that allow them to tailor their education to their interests.

Core Courses

The core curriculum typically includes the following courses:

- Principles of Microeconomics
- Principles of Macroeconomics
- Intermediate Microeconomic Theory
- Intermediate Macroeconomic Theory
- Econometrics
- Economic Statistics

These courses provide a solid grounding in economic theory and quantitative analysis, essential for any aspiring economist.

Electives and Specializations

In addition to core courses, students can choose from a variety of electives to deepen their knowledge in specific areas of interest. Some popular electives include:

- International Trade
- Development Economics
- Behavioral Economics
- Public Economics
- Labor Economics

These electives encourage students to explore diverse economic issues and apply their knowledge to real-world scenarios.

Faculty and Research Opportunities

Georgetown's economics faculty is composed of accomplished scholars and practitioners who bring a wealth of knowledge and experience to the classroom. The faculty members are not only dedicated educators but also active researchers in their fields, contributing to various economic disciplines.

Research Initiatives

Students in the economics major have numerous opportunities to engage in research projects, often collaborating with faculty members. These research initiatives can cover a wide range of topics, including economic policy, market analysis, and social issues. Engaging in research helps students develop critical analytical skills and enhances their understanding of complex economic concepts.

Networking and Mentorship

The faculty's strong connections within the economic community also provide students with valuable networking opportunities. Students are encouraged to seek mentorship from professors, who can offer guidance on academic pursuits, career paths, and internship opportunities.

Career Prospects for Economics Graduates

Graduates of the economics major at Georgetown are well-equipped for a variety of career paths due to their strong analytical and quantitative skills. The program has a track record of success in placing graduates in prestigious positions across multiple sectors.

Potential Career Paths

Some of the common career paths for economics graduates include:

- Financial Analyst
- Policy Analyst
