Program Overview

The Georgia Tech Master's in Economics program is designed to prepare students for the increasingly complex economic landscape. The program emphasizes quantitative and analytical skills, making graduates highly sought after in various fields. With a strong focus on empirical research and data analysis, students learn to apply economic theories to real-world problems. The faculty comprises experts in various economic disciplines, ensuring a comprehensive education that is both theoretical and practical.

Program Structure

The Master's program is typically structured to be completed in two years and offers both full-time and part-time options. Students engage in rigorous coursework that covers core economic principles, quantitative methods, and specialized electives. This flexibility allows students to tailor their

education based on their interests and career aspirations.

Key Features

Some of the notable features of the Georgia Tech Master's in Economics program include:

- Access to cutting-edge research facilities and resources.
- Opportunities for internships and practical experience through partnerships with local businesses and government agencies.
- A diverse student body that enriches the learning experience.
- Networking opportunities through alumni and industry connections.

Curriculum Details

The curriculum of the Georgia Tech Master's in Economics is designed to provide a solid foundation in economic theory while allowing for specialization in various areas. The program includes a mix of core courses, electives, and a capstone project or thesis.

Core Courses

Students are required to complete foundational courses that cover essential topics in economics. Some of the core courses include:

- Microeconomic Theory
- Macroeconomic Theory
- Econometrics
- Statistical Analysis

These courses provide students with a thorough understanding of both microeconomic and macroeconomic principles, as well as the tools necessary for empirical research.

Elective Specializations

In addition to core courses, students can choose from a variety of electives

that allow them to specialize in areas such as:

- Behavioral Economics
- Environmental Economics
- Labor Economics
- International Economics

These electives enable students to delve deeper into specific topics of interest, equipping them with the expertise needed to succeed in their chosen fields.

Admission Requirements

Applying to the Georgia Tech Master's in Economics program requires careful preparation. Prospective students should familiarize themselves with the admission requirements to ensure a successful application.

Eligibility Criteria

Applicants typically need to have a bachelor's degree in economics or a related field. However, candidates from diverse academic backgrounds may also be considered, provided they demonstrate strong quantitative skills. Additional eligibility criteria include:

- A minimum GPA requirement, often around 3.0 or higher.
- Submission of GRE scores, although some exceptions may apply.
- Letters of recommendation from academic or professional references.
- A statement of purpose outlining the applicant's interest in economics and career goals.

Application Process

The application process for the Georgia Tech Master's in Economics program typically involves several steps. Prospective students should:

1. Prepare all required documents, including transcripts, GRE scores, and letters of recommendation.

2. Complete the online application form.
3. Submit the application by the designated deadline.
4. Participate in an interview if required.

Staying organized and adhering to deadlines is crucial for a successful application.
