Overview of the GWU Economics PhD Program

The GWU Economics PhD program is designed to prepare students for advanced research and teaching roles in economics. It combines rigorous coursework with extensive research opportunities, ensuring that graduates are well-equipped to contribute to the field of economics. The program emphasizes both theoretical and empirical methods, allowing students to develop a comprehensive understanding of economic principles. Students are encouraged to engage with current economic issues, fostering a practical approach to their studies.

Located in the heart of Washington, D.C., the program benefits from close proximity to numerous governmental, international, and non-profit organizations. This unique location provides students with access to a wealth of resources and networking opportunities that can enhance their academic and professional experiences.

Curriculum and Specializations

The GWU Economics PhD curriculum is structured to provide a strong foundation in economic theory, quantitative methods, and applied economics. The program typically takes five to six years to complete, depending on the student's research progress and dissertation work.

Core Courses

Students in the GWU Economics PhD program must complete a series of core courses that cover essential topics in economics. These courses often include:

- Microeconomic Theory
- Macroeconomic Theory
- Econometrics
- Mathematical Economics
- Research Methods

These foundational courses equip students with the necessary analytical tools to tackle complex economic problems. In addition to core courses, students can choose from a variety of electives to tailor their education to their specific interests.

Specializations

GWU offers several areas of specialization within the Economics PhD program, allowing students to focus on their particular interests. Common specializations include:

- Development Economics
- Labor Economics
- Public Economics
- International Economics
- Industrial Organization

These specializations enable students to gain in-depth knowledge and expertise in their chosen fields, preparing them for academic research and

professional roles in those areas.

Admission Requirements

Admission to the GWU Economics PhD program is competitive, and applicants are expected to meet several key requirements. The program seeks candidates with strong academic backgrounds, particularly in economics and related fields.

Application Components

To apply for the program, candidates must submit the following components:

- Completed application form
- Official transcripts from all post-secondary institutions
- GRE scores (General Test)
- Statement of purpose
- Letters of recommendation (typically three)
- Resume or CV

The statement of purpose is particularly important, as it allows applicants to articulate their research interests and career goals. Letters of recommendation should ideally come from academic professionals who can speak to the applicant's potential for success in a PhD program.

Prerequisites

While there are no strict prerequisites, a solid background in economics, mathematics, and statistics is highly recommended. Applicants with advanced coursework or experience in these areas will be favored during the selection process.

Faculty and Research Opportunities

The faculty at GWU's Economics Department is comprised of accomplished scholars and practitioners with diverse research interests. This diversity enriches the academic environment and provides students with various perspectives on economic issues.

Research Areas

Faculty members engage in a wide range of research areas, including but not limited to:

- Behavioral Economics
- Environmental Economics
- Health Economics
- Economic Policy Analysis
- Economic History

Students are encouraged to collaborate with faculty on research projects, which can also enhance their own dissertation work. Opportunities for presenting research at conferences and publishing in academic journals are readily available, furthering students' academic credentials.

Research Centers

GWU hosts several research centers that focus on various aspects of economics. These centers act as hubs for interdisciplinary research and provide students with additional resources and networking opportunities. Participating in center-sponsored events can significantly enhance a student's educational experience.

Career Outcomes for Graduates
