## Overview of NYU Economics Programs

New York University offers a variety of economics programs through its College of Arts and Science and the Stern School of Business. These programs are designed to provide students with a comprehensive understanding of economic theories, quantitative methods, and real-world applications. Students can choose between a Bachelor of Arts (BA) in Economics or a Bachelor of Science (BS) in Business with a concentration in Economics. Each program has distinct focuses and outcomes, catering to different career paths.

The BA in Economics at NYU emphasizes a liberal arts education, allowing students to explore various disciplines while gaining a solid foundation in economic principles. Conversely, the BS in Business with a concentration in Economics prepares students for the fast-paced business environment, integrating economics with business strategies and practices.

## Academic Prerequisites

To apply for an economics program at NYU, students must meet certain academic prerequisites that reflect their preparedness for rigorous coursework. These requirements typically include the

following:

- **High School Coursework:** Applicants should have completed a strong curriculum that includes advanced mathematics, including calculus. Courses in social studies, statistics, and foreign languages are also highly recommended.
- **Standardized Test Scores:** NYU has adopted a test-optional policy for most programs, but submitting SAT or ACT scores can still enhance an application, particularly for students with exceptional scores.
- **GPA Standards:** A competitive GPA is essential, with successful applicants often having GPAs above 3.5 on a 4.0 scale.

Prospective students should also consider taking Advanced Placement (AP) courses or International Baccalaureate (IB) courses if available, as these can demonstrate academic rigor and readiness for college-level coursework.

## Application Materials

When applying to the economics programs at NYU, students need to submit a range of application materials that provide a holistic view of their qualifications. The essential components include:

- **Common Application or Coalition Application:** Applicants must complete either of these applications, which include basic information, academic history, and extracurricular activities.
- **Personal Essay:** A well-crafted personal statement that reflects the applicant's motivations, interests in economics, and career aspirations is critical. This essay should highlight unique experiences and perspectives.
- **Letters of Recommendation:** At least one or two letters from teachers or mentors who can speak to the applicant's academic abilities and character are required.
- **Transcripts:** Official high school transcripts must be submitted, showcasing the applicant's academic performance throughout their high school career.

It is advisable for applicants to carefully review the specific requirements for the program they are applying to, as certain programs may have additional requirements or recommendations.

# Additional Factors for Consideration

Alongside academic prerequisites and application materials, several additional factors can enhance an applicant's profile. These include:

- **Extracurricular Activities:** Involvement in clubs, organizations, or activities related to economics, finance, or leadership can demonstrate a genuine interest in the field.
- **Work Experience:** Internships or part-time jobs in relevant industries can provide practical experience and strengthen an application.
- **Diversity and Background:** NYU values diversity in its student body. Applicants from varied backgrounds and experiences may bring unique perspectives to the program.

Additionally, applicants should ensure that their application is submitted on time and that they adhere to all guidelines provided by NYU. Regularly checking the admissions website for updates is advisable as requirements may change.

# Curriculum Structure for Economics

Once admitted to an economics program at NYU, students can expect a rigorous curriculum designed to provide a deep understanding of economic theory and its applications. The curriculum typically includes core courses, electives, and opportunities for hands-on learning.

## Core Courses
