Overview of the Tufts Economics Department

The Tufts Economics Department is dedicated to providing a robust educational experience that emphasizes critical thinking and analytical skills. The department offers a comprehensive curriculum that covers various aspects of economics, including microeconomics, macroeconomics, and econometrics. The faculty comprises distinguished scholars who are actively engaged in research and are committed to teaching and mentoring students.

The department's mission is to foster a deep understanding of economic principles while encouraging students to apply these principles to real-world issues. This approach prepares graduates to tackle complex economic challenges and equips them with the necessary tools to succeed in their chosen careers.

Additionally, the department emphasizes interdisciplinary learning, allowing students to explore connections between economics and other fields such as political science, international relations, and environmental studies. This

broad perspective enriches the educational experience and enhances students' ability to think critically about economic issues.

Undergraduate Programs

The undergraduate program at the Tufts Economics Department offers a Bachelor of Arts (BA) in Economics. This program is designed to provide students with a strong foundation in economic theory and quantitative methods.

Curriculum Structure

Students in the undergraduate program are required to complete core courses in the following areas:

- Microeconomic Theory
- Macroeconomic Theory
- Econometrics
- Statistical Methods

In addition to core courses, students can choose from a variety of electives that cover specialized topics such as labor economics, development economics, and international economics. This flexibility allows students to tailor their education to their personal interests and career goals.

Capstone Projects and Thesis

As part of their academic journey, students have the option to undertake capstone projects or a thesis. These projects provide an opportunity for students to apply their knowledge to real-world economic issues, conduct original research, and develop their analytical skills further.

Graduate Programs

The Tufts Economics Department also offers advanced degrees, including a Master of Arts (MA) in Economics and a Ph.D. program. These graduate programs are designed for students who seek to deepen their understanding of economics and engage in rigorous research.

Master's Program

The MA program is designed for students who wish to enhance their quantitative and analytical skills. The curriculum includes advanced courses in econometrics, economic theory, and policy analysis.

Students in the MA program benefit from small class sizes and personalized attention from faculty members. They also have the opportunity to participate in research projects and collaborate with faculty on various topics.

Ph.D. Program

The Ph.D. program is geared towards students interested in pursuing academic careers or advanced research positions. The program emphasizes both theoretical and empirical research methodologies. Students are required to complete a series of rigorous coursework and comprehensive exams before focusing on their dissertation research.

The Ph.D. program at Tufts is particularly known for its supportive faculty and collaborative research environment, which encourages students to explore innovative ideas and contribute to the field.
