## Overview of the Economics Major

The Economics major at the University of Virginia offers a diverse and rigorous curriculum that equips students with analytical skills, critical thinking, and a deep understanding of economic principles. The program is designed to prepare graduates for various careers in business, government, academia, and non-profit organizations. The study of economics involves exploring how individuals, businesses, and governments make decisions regarding the allocation of resources, which is essential in today's complex economic environment.

Students will engage with both microeconomics and macroeconomics, learning how various factors influence economic systems. The program emphasizes quantitative analysis and economic theory, ensuring that students gain a comprehensive understanding of both theoretical and practical aspects of economics.

# Core Course Requirements

To complete the economics major at UVA, students must fulfill specific core course requirements. These courses lay the foundation for advanced study in economics and are critical for developing essential analytical skills. The core requirements typically include the following:

- Principles of Microeconomics
- Principles of Macroeconomics
- Intermediate Microeconomic Theory
- Intermediate Macroeconomic Theory
- Econometrics

Principles of Microeconomics introduces students to the behavior of individuals and firms in making decisions regarding resource allocation. Principles of Macroeconomics examines the economy as a whole, focusing on aggregate indicators such as GDP, unemployment, and inflation. Intermediate courses build upon these principles, offering a more in-depth analysis of economic theories and models.

Econometrics is particularly important as it provides students with the statistical tools necessary to analyze economic data. This course enhances students' ability to conduct empirical research, an invaluable skill in various professional fields.

## Elective Course Options

In addition to core courses, students pursuing an economics major at UVA have the flexibility to choose from a variety of elective courses. These electives allow students to tailor their education to their specific interests within the field of economics. Some popular elective options include:

- Behavioral Economics
- International Economics
- Public Economics
- Development Economics
- Labor Economics

Behavioral Economics explores the psychological factors influencing economic decision-making,

while International Economics focuses on trade, exchange rates, and global market dynamics. Public Economics examines government intervention in the economy, and Development Economics looks at economic growth and poverty alleviation in developing countries. Labor Economics studies the dynamics of labor markets and employment policies.

These electives enrich the students' understanding of specialized areas in economics, preparing them for diverse career paths post-graduation.

## **Additional Prerequisites**

Before declaring an economics major, students must meet certain prerequisites. This typically includes completing introductory courses in mathematics and statistics, as these are foundational to understanding economic theories and models. The recommended prerequisites include:

- Calculus
- Introduction to Statistics

Calculus is critical for understanding changes in economic variables and modeling economic relationships, while statistics is essential for data analysis and econometric applications. Students are encouraged to complete these courses early in their academic career to facilitate a smoother transition into the economics major.

## **Skills Acquired through the Program**

Students who complete an economics major at UVA will develop a range of valuable skills that are applicable in various professional settings. Key skills include:

- Analytical Thinking
